OIL LEVEL INDICATOR

MODEL: OLI-HI-50

1.0 APPLICATION:

This indicator is suitable for oil filled distribution transformers & oil filled tanks.

2.0 SCOPE:

Indicator continuously reads level inside the conservator or Oil filled tanks.

3.0 CONSTRUCTION & WORKING:

The indicator has a cast aluminium body and an integrated mounting flange. A pair of permanent magnets separated by a metallic wall are used to prevent oil leaks and the entry of contaminated air into the tank (see schematic). A driving magnet submerged in oil is coupled to a float that serves as a sensor. The driven magnet has a pointer and is situated outside of the body. The pointer allows for readings of the oil level on the dial. To prevent the ingress of moist air, the body of the indicator with the dial is sealed. There are no electrical contacts on this device. Allen Screws can be used to adjust the length of the Float-Arm.

4.0 SPECIFICATIONS:

Liquid in tank:

Compatible with transformer or any other oil.

Specifications:

Temperature : -10° to +115° C of Oil
Pressure : 0 to 1 kg/Cm²
Environment : Indoor or outdoor.

Ingress Protection : IP-65 Corrosion Resistance : C4-M

Mounting:

In order to mount the indicator, the buyer must provide a pad that matches Fig. 4. Depending on the significance of the oil level measurements, a position can be chosen on the vertical wall of the conservator tank.

Calibration:

Dial Size

Unit: 50 mm round (nominal)

: Any calibration as per Customer's requirement

Colour is possible.

: Yellow marking on black background or any

other combination as required.

Float (sensor) and arm:

Material : Float - Nitrophyl, Arm - S.S.

Travel : Max 120 degrees below & above center. Length : Adjustable Float arm length, Max 200mm

5.0 Routine Tests:

Each indicator is tested for

1. Specified levels.

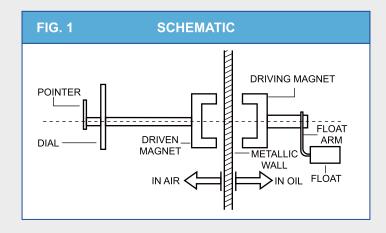

2. Leakage Test.

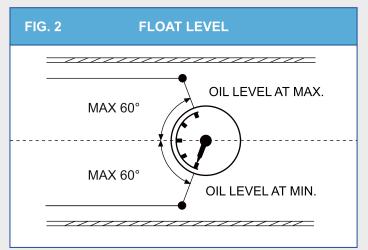

A combined test certificate is issued for each batch.

6.0 HOW TO ORDER:

We provide a Questionnaire for specifying your requirements. However, a drawing is acceptable giving all specifications.

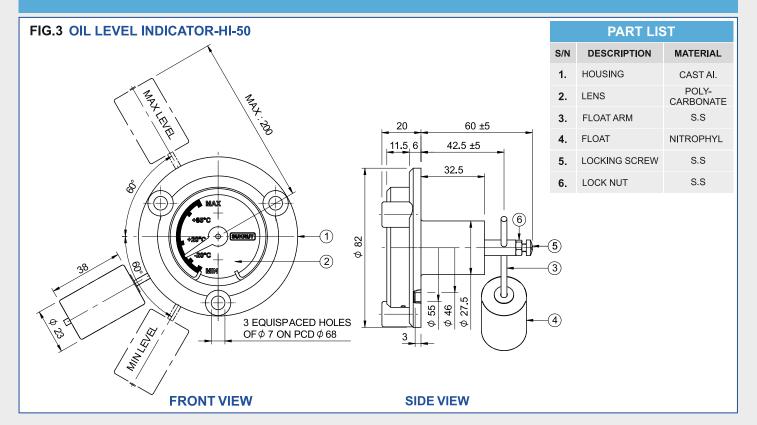

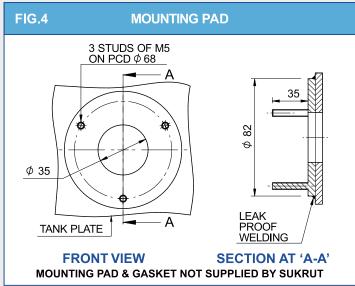

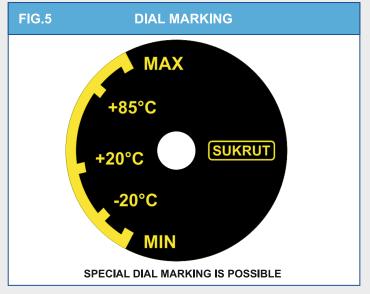

OIL LEVEL INDICATOR MODEL: OLI-HI-50

GENERAL NOTES:

- 1. Indicators of different specifications are not interchangeable. Hence care should be taken while storing Indicators and their Float with Arms. This indicator can be used for vertical mounting as per order.
- 2. Float & Indicator, loose or assembled, should be handled carefully as they cannot be repaired if damaged.
- 3. The complaint of damage or demand for spares should be very specific with respect to Sr. No. of indicator. Lot of correspondence and time can be saved just by informing Sr. No. of concerned Indicator.
